Cristone® Crystal Fiber Stones

Advancing the future of detail polishing with high polishing efficiency and incredible blending strength. Cristone® Crystal Fiber Stones are made with the highest quality, chemically produced crystal fibers creating a crystalline structure that is perfect for detail polishing. Performs great on hardened and heat treated metals.

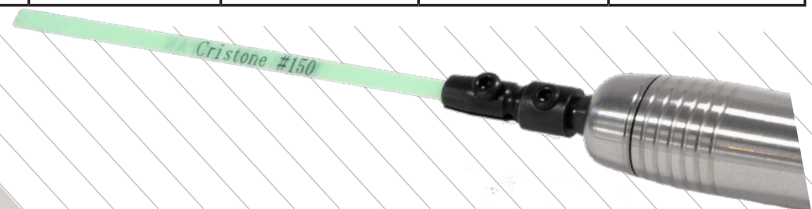

STONES COLOR CODED BY GRIT AND AVAILABLE IN FLAT OR ROUND SHAPES

Cristone® End Bristle Brushes

Ceramic abrasive bristles provide fine surface polishing and high performance deburring of precision parts. Cristone® Bristle Brushes use a nano structure, helping to keep its form while working, providing stable grinding performance. The bristle greatly reduces process time reducing your cost and increasing production efficiency.

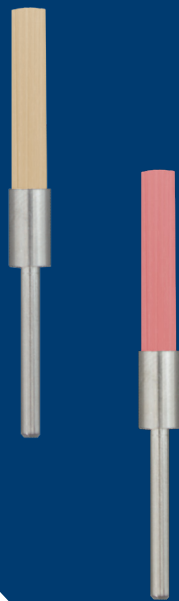

P20 - Hardened • Finished w/150 Grit Brush

Cristone® End Bristle Brushes

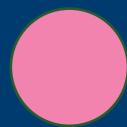

- Aggressive finishing and tool mark removal.
- Works well on hardened steels, carbon steels, prehardened steels, alloy steels, brass, aluminum and composites.
- Perfect tool to use for cross hole deburring, surface finishing and polishing of aircraft parts, engine blocks and medical devices.
- Save time by finishing surface roughness by using only one low grit.
- Bristles spread out when brush rotates for cross hole and inner hole polishing.
- Available in 1 size and 10 grits ranging from 150 grit to 6000 grit.
- **Do Not Use with a pneumatic tool. Electric tools or CNC machines only.**
